LETTER OF TRANSMITTAL

STATE OF ILLINOIS,  
DEPARTMENT OF MINES AND MINERALS.

SPRINGFIELD, ILLINOIS, MAY 1, 1976

*To His Excellency, Dan Walker, Governor  
State of Illinois, Springfield.*

Sir: In compliance with the Illinois Revised Statutes, I am submitting herewith the Annual Report of the Illinois Department of Mines and Minerals for the year 1975. This report includes production, employment, and casualty figures for underground and surface mines; the annual report of the Division of Land Reclamation and the annual report of the Division of Oil and Gas.

Respectfully submitted,

RUSSELL T. DAWE, *Director*

## TABLE OF CONTENTS

	Page
Directors of the Department of Mines and Minerals .....	6
Personnel Roster .....	7
List of State Mine Inspectors and Counties Comprising Their Respective Districts ...	10

### I GENERAL

Table 1—Directory of All Mines .....	12
Table 2—General Statement With Comparative Figures 1970-1974 .....	15
Mines Suspending Operations During 1974 .....	16
Mines Abandoned During 1974 .....	16
New Mines Opened During 1974 .....	16

### II PRODUCTION

Table 3—Average Man-Day Production—All Mines .....	19
Table 4—Output of Shipping Mines by Months, All Mines 1969-1974 1969-1973 .....	20
Table 5—Number of Shipping Mines Operated and Average Days Worked Each Month, All Mines 1969-1974 .....	20
Table 6—Relative Rank of Counties Producing 500,000 Tons or More 1970-1974 .....	20
Table 7—Tons of Coal Produced, Average Days Worked, Number of Mines Operated, and Number of Employees in All Shipping Mines, With Percentage by Years from 1920 to 1968 Inclusive, All Mines 1969-1974 .....	21
Table 8—Mines and production 1973-1974 .....	21
Table 9—Output of All Mines and Days Worked Each Month in 1974 .....	22
Table 10—Disposition of Output, Explosives Used, and How Mined .....	26
Table 11—Railroads Handling Coal and Mines Served by Each .....	34
Table 12—Special Preparation Plants .....	37
Table 13—Physical and Mechanical Characteristics of All Mines, Tons Mined, Total Tons Mined, and Year Mine Opened .....	38
Table 14—Total Production of Coal in Tons by Counties, 1882-1974 .....	42
Table 15—Summary of the Various Seams of Coal, Kind of Opening, Manner of Working and Tons Produced From Each Seam .....	42

### III LABOR AND EMPLOYMENT

Table 16—Non-Fatal Accidents by Counties and Months, 1974 .....	44
Table 17—Comparative Statistics of Fatal and Non-Fatal Accidents for the Period 1928 to 1974 Inclusive .....	51
Table 18—Tons of Coal Mined, Number Employed, Number Killed and Injured, Tons Mined to One Man Killed and Injured, and Ratios Per 1,000 Employed and Per 1,000,000 Tons Mined—1882-1974, Including Injuries Involving Loss of 30 Days or More .....	52

Table 19—Fatal Accidents by Occupation and Causes, 1974 .....	55
Table 20—Causes of Fatal Accidents by Years—1882-1974 .....	55
Table 21—Comparative Statistics of Fatal Accidents for the Period 1965- 1974 Inclusive and Tons Mined to One Man Killed .....	57
Table 22—Fatal Accidents .....	58
Summary of Fatal Accidents .....	59
Table 23—Working Time .....	63
Table 24—Employees .....	63

#### IV MECHANIZATION

Table 25—Machine Mining for the Period 1928 to 1974 Inclusive, All Mines .....	66
Table 26—Number of Mines Operated and Total Tons Mined; Strip Mines and Output; Number of Mines Using Machines, Number Used and Tonnage Undercut; Number of Mines Using Motors for Underground Haulage, Number of Motors Used and Tons Hauled; Also the Percentage of Each Class— Shipping Mines by Years 1907-1968, All Mines 1969-1974 .....	67
Table 27—Method of Loading in All Mines .....	68
Table 28—Mechanical Loading in Shipping Mines for Thirty-eight Years, 1931-1968, All Mines 1969-1974 .....	69
Table 29—Method of Loading in Shipping Mines for Thirty-eight Years, 1931-1968, All Mines 1969-1974 .....	70
Analytical Laboratory .....	71
Report of Miners' Examining Board .....	74
Certificates of Competency Issued by Miners' Examining Board .....	76
Summary of Activities of Mine Rescue Stations .....	100
Report of Metal Mines Operation .....	101
General Description, Training Division, Department of Mines & Minerals .....	102
Report of Certificates of Competency Issued by Mining Board:	
State Mine Inspectors .....	104
Mine Rescue Station Supervisor .....	104
Mine Managers .....	105
Mine Examiners .....	107
Electric Hoisting Engineers .....	113
State Mine Inspector—Metal Mine .....	115
Metal Mine Foreman .....	115
Electric Hoisting Engineers—Metal Mine .....	115
EXPLOSIVES DIVISION .....	116

## MINING BOARD

RUSSELL T. DAWE, *Executive Officer*, Springfield, Illinois

EDNA ROACH, *Chief Clerk*, 414 East Canedy, Springfield, Illinois

JAMES NORTH, *Secretary*, 320 West Fulton Street, Marissa,  
Illinois

NELSON RULE, R. R. 1, Pinckneyville, Illinois

RALPH CAREY, 1800 North Park Avenue, Herrin, Illinois

JOE CRAGGS, Box 47 A, R. R. 3, Johnson Lane, Taylorville,  
Illinois

## MINE RESCUE STATIONS

### SUPERINTENDENTS, ASSISTANTS AND STATION ADDRESSES

Benton	— HARRY BATES, 503 E. Main Street
Coulterville	— WALTER MEYER, P. O. Box 158
DuQuoin	— PAUL McCORMICK, 512 N. Hickory
Eldorado	— CLIFFORD HAFFORD, 1411 Locust
Elizabethtown	— LOUIS ENGLISH, First Street
Springfield	— ROBERT DOWNS, 609 Princeton

### ASSISTANT SUPERINTENDENTS

Benton	— LEON WEST, 520 East Franklin, Sesser
Coulterville	— WILLIAM COULSON, 309 E. Lyons, Marissa
DuQuoin	— WILLIAM McCOLLUM, 524 East Keyes, DuQuoin
Eldorado	— FERN CAGLE, 2437 West Locust
Elizabethtown	— ARCHIE CORNELL, Route 1
Springfield	— FRANK PETREIKIS, 810 N. 8th Street

### MINERS' EXAMINING BOARD

GUY A. FERRARI, *President*, 232 Orchard, Zeigler, 62999  
 GAWAIN FRICK, *Secretary*, R. R. 1, Bonnie, 62816  
 JULIAN KOSKI, 807 First Street, Gillespie, 62033  
 JOHN W. REEDER, R. R. 2, Box 74, Harrisburg, 62946

### METAL MINE INSPECTOR

FRANK GOLDEN, Herod, 62947

### GENERAL OFFICE

*Administrative Assistant*: EDNA ROACH, 414 East Canedy, Springfield, 62703  
*Chief-Clerk*: JOSEPH C. TABOR, R. R. 6, Springfield, 62707  
*Accountant*: ADELE FUCHS, 400 West Cook, Springfield, 62704  
*Secretary II*: JAYNE TALBOTT, 146 Georgetown Drive, Springfield, 62702  
*Secretary II*: EVELYN CUMMINGS, 2055 Cardinal Drive, Springfield, 62704  
*Clerk-Typist III*: CHARLENE KESSLER, P. O. Box 11, Divernon, 62530

**EXPLOSIVE INSPECTION AND  
MINE TRAINING SERVICE  
BENTON, ILLINOIS**

ADMINISTRATOR: Donald Simpson, R. R. 2, Benton, Ill., 62812

INSPECTOR: James R. Storey, R. R. 1, Sesser, Ill., 62884

INSPECTOR: Lester W. Glynn, 58 Second St., LaSalle, Ill., 61301

INSPECTOR: Robert Anderson, 2917 Dale, Granite City, Ill.,  
62040

INSPECTOR: Donald Hafliger, 421 E. Esther, Taylorville, Ill.,  
62568

INSTRUCTORS: Russell Spitzner, 1201 N. Garfield, Marion, Ill.,  
62959

Wilbur Franklin, Box 121, Tilden, Ill., 62292

Thomas Pinnell, Box 73, Farmersville, Ill.,  
62533

I GENERAL—TABLE 2  
GENERAL STATEMENT WITH COMPARATIVE FIGURES—  
1971-1975

	1975	1974	1973	1972	1971
<b>COUNTIES AND MINES</b>					
Number of counties producing coal . . . . .	20	21	22	22	22
Number of mines operated . . . . .	57	55	56	59	63
Number of underground mines . . . . .	21	23	24	26	27
Number of strip mines . . . . .	36	32	32	33	36
<b>OUTPUT OF TONS</b>					
All mines . . . . .	59,539,019	58,072,640	61,548,670	65,521,394	58,415,239
Underground mines . . . . .	31,880,083	31,104,112	32,577,353	31,715,795	29,453,926
Strip mines . . . . .	27,658,936	26,968,528	28,971,317	33,805,599	28,961,313
<b>DISPOSITION</b>					
Tons handled by railroads . . . . .	48,548,219	47,618,180	51,291,010	49,079,672	44,654,620
Tons loaded on barge for shipment . . . . .	2,962,926	2,231,921	2,169,781	5,963,238	5,018,108
Tons disposed of otherwise . . . . .	8,027,874	8,222,539	8,087,879	10,478,484	8,742,511
<b>EMPLOYEES</b>					
Underground mines . . . . .	9,549	8,718	7,794	7,870	7,088
Strip mines . . . . .	4,097	3,749	3,615	3,367	3,483
All mines . . . . .	13,646	12,467	11,409	11,237	10,571
<b>AVERAGE DAYS WORKED</b>					
Underground mines . . . . .	243	217	211	222	215
Strip Mines . . . . .	189	191	197	216	161
All mines . . . . .	205	202	203	219	184
<b>MINING METHOD</b>					
Number of mining machines in use . . . . .	47	36	35	36	44
Tons mined by machine . . . . .	31,880,083	31,104,112	32,577,353	31,715,795	29,453,926
Tons mined by stripping . . . . .	27,650,393	26,968,528	28,971,317	33,805,599	28,961,313
<b>LOADING</b>					
Number of mechanical loaders in use . . . . .	52	35	31	41	44
Continuous mining machines in use . . . . .	138	133	133	118	115
Tons loaded mechanically . . . . .	31,880,083	31,104,112	32,577,353	31,715,795	29,453,926
Tons loaded by hand . . . . .					
<b>EXPLOSIVES</b>					
Pounds of explosives used for blasting overburden . . . . .	50,340,544	45,414,647	85,691,327	68,753,332	54,132,574
Pounds of pellet powder used . . . . .	8,416	119,650		994,165	40,000
Pounds of dynamite used . . . . .	6,182,805	9,230,510	1,760,640	468,834	707,512
Pounds of permissible used . . . . .	265,250	21,454,270	69,339	127,690	169,953
<b>HAULAGE</b>					
Number of motors used in under- ground haulage . . . . .	142	104	97	79	89
<b>CASUALTY</b>					
Number of fatal accidents . . . . .	8	12	6	11	15
Number of non-fatal accidents . . . . .	577	465	488	607	535
Tons mined to one man killed . . . . .	7,442,377	4,839,387	10,258,111	5,956,490	3,894,349
Tons mined to one man injured . . . . .	103,187	124,887	126,124	107,943	109,187
Number employed to one man killed . . . . .	1,706	1,039	1,902	1,022	704
Number employed to one man injured . . . . .	24	27	23	19	20
<b>MISCELLANEOUS</b>					
Number of mines using closed lights . . . . .	21	23	24	26	27
Number of mines using compressed air machines . . . . .	10	11	11	13	15
Number of mines using continuous miners . . . . .	15	17	17	22	19

## SUMMARY OF FATAL ACCIDENTS 1975

Mr. Jackson H. Ray, age 44, married, two dependents, and Mr. Kenneth A. Hunt, age 36, married, four dependents, came to their death at approximately 7:10 p.m., Wednesday, May 28, 1975, from crushing injuries caused by a roof fall, while in the performance of their duties, at the Peabody Coal Company, Mine No. 10, Pawnee, Illinois, Christian County, where Mr. Ray was employed as a Miner Operator and Mr. Hunt was a Timberman.

The roof fall occurred in the face area of No. 4 Entry of the 2 East First South 5½ W. Main South Section.

Mr. Hunt, who was operating the Miner, started a cross-cut to the left, starting on the left side and finishing on the right. It was after they finished cutting this cross-cut that they began cutting down what was considered loose rock. In the process of brushing down this loose rock, the roof fell, fatally injuring both the men.

Mr. Thomas L. Jones, age 27, married, one dependent, came to his death at approximately 6:30 p.m., Tuesday, June 3, 1975, from electrical shock, while in the performance of his duties as Belt Maintenance Man at the Freeman United Coal Mining Company, Orient Mine #3, Waltonville, Jefferson County, Illinois.

Mr. Jones was working at the 3960 Station Cross-cut between the 3rd and 4th west, 2nd west, main north, with an impact wrench. The wrench had a small metal screw that held the switch mechanism in place that was loose in the handle of the drill. It came in contact with the power source, thereby shorting to the handle of the impact wrench that Mr. Jones was using, causing him to become a part of the electric circuit.

Fellow workmen, management and union assisted the victim with artificial respiration in the form of mouth to mouth resuscitation and heart massage, continuously, until the victim was removed from the mine and pronounced dead.

Mr. Alfred Larry Lowe, age 44, married, came to his death at approximately 2:10 a.m., Wednesday, July 23, 1975, from electrical shock, while in the performance of his duties as Repairman at the Consolidation Coal Company, Hillsboro Mine, Coffeen, Montgomery County, Illinois.

Mr. Lowe, the regular Repairman in the 1st SE Entries, Left Side Section was idle on this particular shift, and was sent into the 1st Left Panel at starting time to replace the regular repairman, who was not working.

Mr. Lazenby, Tubing-Man, tried to start the auxiliary exhaust fan, and reported to Mr. Stanley Pelc, Faceboss, that the fan would not start, and was told that he would have Mr. Lowe check to see what was wrong. Mr. Lowe began checking the fan at about 1:05 a.m., and, in the course of attempting to find the trouble, checked most of the trail cable visibly, energized the power circuit several times, and had removed the cover from the control panel, as mounted on the fan. Mr. Lowe did not have his regular electrical test equipment with him, and although he thought the fan was "single-phasing", had not solved the problem by 2:00 a.m.

Mr. Lowe's efforts were not successful in correcting the problem and Mr. Pelc contacted the Master Mechanic, Mr. Dave Farr, and explained that additional help would be needed. Mr. Farr contacted Mr. Tom Henry, Assistant Master Mechanic, by radio-phone, and told him to go to the 1st Left and help Mr. Lowe, as Mr. Henry had the necessary electrical equipment with him and was on his way to the 1st Left Section at 2:10 a.m.

At about 2:05 a.m., Mr. Pelc, Mr. Lowe, and Mr. Lazenby were at the power distribution unit and phone location, when Mr. Lowe wanted to try one more to find the trouble, although Mr. Pelc told him that help was on the way and to wait. As Mr. Lowe started back to the fan, Mr. Pelc told Mr. Lazenby to go and stay with him. Mr. Lowe had previously spread some brattice cloth in front of the control panel as the area around the fan was wet and muddy, and upon returning to the fan, kneeled in front of the control panel with his right hand on the lower right corner of the control panel, near the trail cable, toward the upper left corner of the control panel. In an attempt to close the 100 amp fan motor circuit breaker, he placed the fingers of his left hand across the top of the breaker to provide leverage to pull up on the "throw" with his thumb. As he did this, his middle index finger of his left hand went against one of the energized phase leads at the top of the circuit breaker, thus receiving 277 volts through his body. Efforts were made to check for heartbeat and breathing and an attempt made to pry open Mr. Lowe's jaws, in order to apply artificial respiration. The attempt was unsuccessful.

Mr. Donald R. Montgomery, age 22, married, one dependent, came to his death at approximately 5:40 p.m., on August 14, 1975, from crushing injuries by a roof fall, while in the performance of his duties as a Belt Maintenance Man at the Consolidation Coal Company, Hillsboro Mine, Coffeen, Montgomery County, Illinois.

During the regular mining cycle in #2 room in the 1L 4 rooms, a roof fall occurred at 5:40 p.m., resulting in the death of Mr. Donald Montgomery. A piece of top rock fell striking the victim in the left side of his head, causing a skull fracture, a broken neck and other injuries.

Mr. Sammy G. Tanner, age 29, married, one dependent, came to his death at approximately 1:50 p.m., from a roof fall, while in the performance of his duties as a Continuous Miner Operator at the Inland Steel Company, Mine No. 1, Sesser, Franklin County, Illinois, on September 19, 1975.

The Pillar Lift in the solid coal pillars, off Room No. 9+3 in 4 Left, East Main was offset to avoid a roll that was visible in the room. The lift was driven and a fender mined to the left. The Continuous Miner was moved back into a previous room intersection and started to reduce the final coal block so a good pillar could be obtained. The intersection was fully bolted with 6 foot bolts and greater than 8 inches of roof coal left, according to plan. The second shuttle car of coal had just left when the foreman detected roof movement in the intersection. He yelled for the two Miner Operators and Mechanic to get out. They started to run, a massive fall occurred immediately in the intersection, which brushed the foreman as he ran out, catching Mr. Tanner and crushing him.

Mr. James T. Ray, age 27, married, one dependent, came to his death by drowning, at approximately 2:00 a.m., November 16, 1975, while in the performance of his duties as Pumper at the Peabody Coal Company, River King Strip Mine, Pit #6, Marissa, St. Clair County, Illinois.

Mr. Ray was having difficulty starting a pump in 5761 Pit, and was told by Mr. Dennis Winters, third shift Pit Foreman, to get a repairman from the shop to help, if he could not start the pump. At approximately 2:00 a.m., Mr. Ray got into his pickup truck

and left the pit. Mr. Winters called Mr. Ray on the radio several times. Mr. Winters began a search throughout the area for Mr. Ray and his truck, to no avail.

At daylight Mr. Winters spotted a water cooler floating in a small body of water along the side of the access road, which connects the 5761 pit haulage road and County Road #18. Upon closer examination, a set of tire tracks were found leading from the road into the edge of the water.

Mr. Jerry Cox, a member of the O'Fallon, Illinois Rescue Squad was called and, after several dives, located the truck about 20 feet from the bank in 20 feet of water. After hooking a cable to the truck, it was pulled to the bank and Mr. Ray was alone in the truck. He was pronounced dead at the scene by the Randolph County Coroner, at 8:30 a.m.

Mr. Donald G. Jansen, age 21, married, one dependent, was fatally injured by an explosion at approximately 10:40 p.m., on December 31, 1975, while in the performance of his duties as Driller-Shooter at the Peabody Coal Company, River King Strip Mine, Pit #6, southwest of Marissa, Randolph County, Illinois.

Mr. Jansen, and Mr. William Bowling (Shooting Foreman) were attempting to shoot the first 9 holes of a group of 18 holes to be shot. Having tried two times to set off the shots without success, Mr. Bowling stated that Mr. Jansen ran the primer cord between #13 and #14 holes for safety, due to the fact they were positioned in front of loaded holes. Therefore, this would mean there were three groups of shots #1 thru #9, where the primer cord was cut and the cap placed, #10 thru #13 holes where the primer cord was untied for safety, and #14 thru #18 holes. Holes 1 thru 9 were wired with 17mm delays, but no delays were in truck lines on the rest of the holes. Mr. Bowling was standing on the passenger side of the truck and Mr. Jansen a few feet away by the right front fender. The hood of the truck was up so that they could shoot off the truck battery. After calling for clearance and receiving it, Mr. Bowling stated that Mr. Jansen set off the shots and he remembers seeing the first shot, the #9 hole fire, and then a second later the holes in front of which they were standing exploded. Mr. Jansen was still on the passenger side of the truck, nearly covered with rock from the blast. He was quickly uncovered and taken to the Sparta Hospital where he was pronounced dead.

\*Statistics from 1969 to present are not comparable with those of prior years as they include local mines which were not reported previously in this table.

## ANALYTICAL LABORATORY

The Department of Mines and Minerals Analytical Laboratory was established in 1948 by the State Legislature.

The investigation of the Centralia, Illinois mine disaster which claimed the lives of 111 miners in the spring of 1948 established the fact that Illinois needed an Analytical Laboratory for the health and safety of coal miners.

The Analytical Laboratory of the Department of Mines and Minerals consists of two divisions: Safety and Coal Analysis.

### Safety Division

The purpose of this division is to analyze atmosphere samples for oxygen, explosive and noxious gases to comply with the Coal Mining Act. Mine dust samples are analyzed for the percentages of combustible and incombustible materials to determine flame propagating characteristics. Atmosphere samples are collected from coal, spar, metal mines and quarries in the State of Illinois, thus ascertaining compliance with State mining laws in regard to health and safety conditions.

The Department Laboratory this year adopted atmospheric analysis using a gas chromatography method which is far more accurate, economic and rapid. Samples are taken from a number of points in each mine at least once per month and mailed to the Department in 10 ml vacuum containers. While routine analysis is usually performed at the Department, mine fires and other emergencies may require a portable gas chromatograph at the scene for rapid analysis of samples that can reveal conditions deep underground.

Samples are analyzed for CO, CO<sub>2</sub>, methane, oxygen and nitrogen with a four-column gas chromatograph using a nickel nitrate catalytic converter to convert CO and CO<sub>2</sub> to methane for detection in a flame ionization detector. Oxygen and nitrogen are detected by a thermal conductivity detector. An electronic integrator is also used to increase accuracy in the system.

### Coal Analysis

The coal analysis program was designed to insure the quality of coal purchased for State institutions by the State of Illinois. The

program was planned by the State Purchasing Department and the Director of the Department of Mines and Minerals.

The plan is for frequent samples from State mental, charitable, penal institutions and State universities using coal to assure quality coal is supplied.

Within an average month, numerous samples of coal are pulverized and delivered to the Analytical Laboratory, where they are analyzed. If delivered coal does not meet contract specifications, the State may level penalties as provided in the contracts.

As a result of this program, General Services Purchasing Division is able to procure better grades of coal for less money. In addition, an estimated 20% efficiency was realized in heating the various state institutions.

Early in 1970, a new Mine Rescue Station and Analytical Laboratory Building at 503 East Main Street, Benton, Illinois was completed. The modern one-story building, covering 13,372 square feet, houses the latest of mine rescue and laboratory equipment. This is the first permanent building for the laboratory since its establishment in 1948.

**GENERAL DESCRIPTION  
TRAINING DIVISION  
DEPARTMENT OF MINES & MINERALS**

The Department, in 1971, established the Safety Training Division to provide instruction for miners in the safety aspect of coal mining and to implement any new training objectives that might be desirable and feasible. The Division consists of three full time state mine inspectors, one secretary and a training coordinator. The section staff is supplemented from time to time with an explosive inspector and a fourth state mine inspector to provide explosive and electrical safety instruction, respectively. Instruction is offered at 10 to 12 different locations throughout the state, normally at state or public offices; however, in some instances it is offered at a central coal mine site.

Although the training is available to all coal miners, the instruction is attended primarily by those personnel desiring to obtain certificates of competency as mine examiner, mine manager, hoisting engineer and state mine inspector. Certification is required by law (Chapter 93, Illinois Revised Statutes) for those personnel holding such positions.

The instruction offered deals with first aid, mine rescue techniques, accident prevention, state and federal mining laws, ventilation, roof and rib control, electricity, safety instrumentation, etc. Upon conclusion of the course, which is held twice annually, the Department (including the Mining Board) administers examinations, both oral and written, to those personnel desiring certificates. The site for such examinations is usually at the West Frankfort Armory.

Under authority of the Federal Coal Mine Health and Safety Act of 1969 the Bureau of Mines (now referred to as MESA in regards to regulation enforcement) established mandatory safety standards for the mining industry. In conjunction with these standards certain mine training requirements were established. Since state and federal objectives were practically the same the Department applied for federal grant in April of 1971. Grant approval was obtained and the first remuneration was received in April of 1972 based on the federal government returning 80% of the funds expended. The grant program has been extended from time to time. Progress reports, fund accounting, etc. are a part of the Division's function.

The Department also issues certificates of competency for metal mine foreman, metal mine hoisting engineer and state metal mine inspector. Examinations are also given to establish the proficiency of mine rescue station superintendents and their assistants. These functions all require certain section duties.

## *Explosive Division*

---

---

**GENERAL DESCRIPTION**  
**EXPLOSIVES DIVISION**  
**DEPARTMENT OF MINES & MINERALS**

The Department, in July 1971, established the Explosives Division as a result of the State Legislature passing Senate Bill No. 44, known as the Explosives Licensing Act. Such Act supplemented an Act which had been administered by the Department since July 12, 1939 dealing with the manufacture, possession, storage, transportation, use, sale and gift of explosives. Headquarters for this section was established at the Mine Rescue Station and Analytical Laboratory Building located at 503 East Main Street, Benton, Illinois.

Licensing provisions of the original explosives act dealt with explosive storage magazines. Provisions of the 1971 act dealt with licensing of individuals who wish to use or possess explosives. The statutes call for applicant interview, examination, etc. There were 904-1975 Certificates issued for explosives storage and 399 explosive licenses (82 new & 317 renewals) issued to individuals in 1975.

Three explosive inspectors and an explosive inspector-supervisor constitute the Division field personnel. In addition to those inspections performed in conjunction with the licensing procedure described above inspections are made at the following places to insure compliance with the law; all explosive dealers and A N F O manufacturing plants. Investigations are also performed in connection with complaints against explosive users. Investigations include advising both the complainant and the accused of the findings and making suggestive recommendations for appeasement or further pursuit of the matter.

Explosives safety training classes were begun in June of 1974 and were held throughout the coal mining field during 1975. Funding assistance from MESA, in conjunction with other reimburseable training expenses was provided.

## DEPARTMENT OF MINES AND MINERALS

## EXPLOSIVES DIVISION

## Employees

Safety Engineer	Donald C. Simpson R. R. 2 Benton, Illinois 62812
Explosives Inspector- Supervisor	Robert Anderson 2917 Dale Avenue Granite City, Illinois 62040
Explosive Inspector	James Storey Box 23 Whittington, Illinois 62897
Explosive Inspector	Lester W. Glynn 58 Second Street LaSalle, Illinois 61301
Explosive Inspector	Donald Hafliger 421 East Esther Taylorville, Illinois 62568
Clerk Typist I	Bette B. Reynolds 605 North Ward Street Benton, Illinois 62812

## ABSTRACT

The year, 1975, was by no means an uneventful year for land reclamation activities in Illinois. The reclamation law was amended, effective July first. The Division staff has been enlarged and there was a reclamation advisory council created. Rules and regulations for the new, amended law were promulgated and the Division has engaged a person to serve as hearing officer, on an ad hoc basis.

The original Open Cut Land Reclamation Act (OCM) ended its influence during 1975, as all obligations thereunder were completed and record books closed.

Reclamation performed by coal companies under the OCM and Mined Land Reclamation Act laws created 29,465 acres of graded pasture land, all of which was done beyond legal requirements (1962-1972 mining regulation time period).

Acreage of surface mining permits (all minerals) issued during 1975 was 7,431.36 compared with 5,560 acres in the preceding year.

Over 40% of the coal affected land, for permit year 1973, has already been reclaimed and bonds released, as of 1975, even though the time limit does not expire until July 1, 1976.

Pasture land use continued to dominate the reclamation land use choice, in 1975, and forest and wildlife acreages continued to be minor categories.

For permits issued in 1975, 37.56% of the acreage will be reclaimed to approximate original contour with rock limitations.

Notices of noncompliance sent out, during 1975 under the Mined-Land Conservation and Reclamation Act, sharply increased over the preceding year. There have been two bond forfeitures requested already, under the MLC&R Act. Both cases involve new companies experiencing bankruptcy. The number of companies against which bond forfeitures have been requested has now been enlarged to twenty-one.

Acreage reclaimed to date by the Land Reclamation Division, by the use of bond forfeiture funds, is 489.4 acres. Planting and seeding were done on 328.4 acres in 1975.

During 1975, there were five mines found to be operating illegally. All of these mines were closed by voluntary closure, except for one where a court injunction was secured.

There are two legal cases where the Department of Mines and Minerals finds itself a defendant in lawsuits filed by local government groups wherein surface mining and local ordinance conflicts are alleged.

Decreasing annual acreage of coal surface mining has persisted, since 1969, and the decreased annual acreage trend continued in 1975. The rate of decrease amounts to about one thousand acres, over a four-year period.

There has been a total of 186,397 acres in Illinois affected by coal surface mining, as of June 30, 1975.

The increased acreage of permits issued in 1975 would suggest that the trend of decreased coal surface mining may be ending.

In 1975, coal surface mining was active in 15 counties and this number did not change from the 1974 figure.

Public hearings, provided by the 1975 amended law, were held for two permit applications, during 1975. In one case, the proposed reclamation plan was rejected and the permit was denied.

Appendix tables in this report present data on land use patterns, land ownership category, assessed valuation, mining techniques, and overburden depths, for mining permits issued during 1975. Some narration is provided showing trends or lack of trend in these data, over the past four-year period.

## ADMINISTRATION OF ILLINOIS SURFACE MINING LAWS

Three surface mining land reclamation laws exist in Illinois. The Open Cut Mining (OCM) Act started in 1962. The Surface-Mined Land Reclamation Act (SMLRA or MLR) took effect in 1968. In 1971, the Surface-Mined Land Conservation and Reclamation Act (SMLC&RA) applied only to one permit but applied to all permits beginning July 1, 1972. The 1971 Act was amended in 1975 and permits issued thereunder are referred to as SMLC&RA amended permits.

Surface-mined areas affected under a given law are reclaimed under standards set forth under that law despite the fact that a subsequent law may have been enacted. None of the laws are retroactive. It is necessary for state enforcement personnel to know boundary lines of the different mining years because different reclamation standards may apply to each.

The 1975 amended law, as might be expected, is more comprehensive than preceding laws. Carrying out newer restrictions requires greater effort not only by the mining companies but also by the state Land Reclamation Division. The technical staff was enlarged. There are now seven districts in the state contrasted with five districts in 1974. The required seven-member Advisory Council on Reclamation has been appointed by the Governor and is now operating. The Division also has a hearing officer to conduct the necessary public hearings and also to act as a legal consultant on special matters.

The year 1975 was very busy because, in addition to continuing the regular administrative duties, the new rules and regulations, under the amended act of 1975, were developed and, finally, in early 1976, promulgation was consummated. Ramifications of new rules are many and varied. The forms used to execute various phases of the law had to be revised and, of course, revised information disseminated.

If the foregoing gives one the impression that dealing with state land reclamation laws is a complex matter, that impression is probably justified. Throughout this report, one will notice various tables with explanatory footnotes and various labels or headings and sub-headings. Though this report is presented for a calendar year (1975), this same time span experienced: (1) conclusion of permit year 1975 (6-30-75); (2) reporting of permit year 1974 extension acres that were affected in permit year 1975; (3) issuance of 1976 permits prior to 7-1-75 under the 1971 SMLC&R Act and after 7-1-75 under the SMLC&R Act amended 1975; (4) bond releases

TABLE I

during the calendar year under all three laws; and, (5) other activities which occurred during the calendar year.

Those who wish to interpret statistical tables precisely are urged to note carefully all table labels. Interpretation by narration is intended for readers of this report with general interest in the subject matter. Those with special or academic interest who wish further explanation or detail should not hesitate to address questions either to the Land Reclamation Division's Springfield office or to any of the district field representatives listed on page two of this report.

Table I shows there were 229 mine locations under inspection, during 1975, of which 15 came under the amended SMLC&R Act (after 7-1-75). This compares with 210 mines reported for the preceding year. The higher number for 1975 is not necessarily significant. Aggregate type mining operations do not necessarily require new permits annually unless lateral enlargement of existing operations is planned. Some only require new permits every two or three years. Of the 123 permits issued during the year, there are 15 permits shown in Table I under the amended Act. For reasons just explained, the number of mines under inspection always is greater than the number of mines under active mining permit.

The year, 1975, was a milestone year in regard to number of mines under inspection. Several mines, long since inactive (OCM permits), completed reclamation work during 1975 and will no longer require inspection. As a result, some reduction in number of mines under inspection in 1976 might be expected.

Though permits are issued throughout the year, the general bulk of permits are issued just prior to the end of June. Table I shows 7,200 acres of permits issued as of June 30, 1975. This contrasts with 6,582 acres of permits for all minerals in the preceding year.

One can notice that, for accumulated acres totals, in Table I, over a period of years, the acreage affected has been less than the acreage permitted by those permits. Since the "book is closed" on OCM and MLR affected acreages, we can compare a total 70,109 acres of permits issued against 69,257 acres affected. The difference occurs because permits are based on what a mine operator plans to affect and the affected acreage column shows, at times, something short of that was achieved.

Table I shows this year's permit acreages against which no affected acreage is shown. The reason is that affected acreage is now occurring under those permits and won't be reported until the following year. Since Table I deals with permits and related statistics rather than time period, noting this distinction should help prevent erroneous data interpretation.

## AFFECTED ACREAGE AND RECLAMATION STATUS

There is no single table that shows total amount of land reclamation work done, during calendar year 1975, for the whole state. Table II summarizes data performed as per the OCM and MLR rules and Table III deals with reclamation performed as per MLC&R rules and summarizes reclamation acres according to corresponding permit years with no identity of year in which the reclamation work was actually performed. To determine total acres reclaimed in the whole state during 1975, one would have to total the 1975 figure from Table II with another figure arrived at by subtracting from Table III the corresponding figures from Table III in the 1974 Annual Report.

### PART I (OCM AND MLR AFFECTED ACRES RECLAMATION)

Table II shows status of acres affected under the OCM and MLR laws. Of the 66,260 coal acres affected, 66,455 acres (103%) have been reclaimed. At this point, along with calling attention to the "surplus" reclamation, it is pointed out that the MLR Act (mining ending 6-30-72) allowed a three-year time period for completion of reclamation. This three-year time period expired 6-30-75. Consequently, if the law were being observed, it was expected that all reclamation be completed in 1975. And, in fact, it seems that this has actually occurred, as reflected in Table II.

To explain the surplus reclamation experienced requires calling to mind a provision of the reclamation laws permitting substitution of pre-law acres reclamation for credit on acreage affected under the law. Once this was started, eventual reclamation of all acres affected under the law, predictably would generate surplus reclaimed acres. Though some operators may not voluntarily reclaim acreage beyond that required, there is a general tendency among major operators to reclaim all their affected acres regardless of legal obligation. Blanket bonding, formerly permitted, also may be a factor. A company with more than one mine routinely has been allowed to apply large reclamation acreage from a given mine to satisfy total state-wide legal obligations on a blanket bond. However, whenever legal obligations of a given mine have been satisfied, the state has not permitted further surplus acreage reclamation toward reducing legal obligations of another mine. Rather, in such cases, they were given reclamation approval with zero bond release and, of course, released acres with zero bond release generates surplus reclamation acres. It is predicted that the

\*3 Reclamation Bond Released &amp; Rebonded for Refuse Disposal

\*4 Reclamation Bond Released &amp; Rebonded for Reaffected Acreage

surplus acreage will grow even larger because there are a number of areas now reclaimed, for which surplus reclamation status probably will be sought by mine operators. The Land Reclamation Division personnel routinely try to urge all operators to reclaim and request inspection and approval on all acres affected.

Table II also shows, for aggregate mining categories, total reclamation acreage smaller than acreage affected. Since bond releases were not secured during 1975 (the end of the three-year time limit for reclamation) it may be presumed that these instances represent time extensions granted, under the law, to allow more time where operating conditions (common in the aggregate mining industry) prevent land reclamation work due to conflict with active mining activity.

There were 4,356.46 acres approved as reclaimed in 1975 on coal lands for work performed under OCM and MLR rules respectively (Table II). One can also note, in Table II, the breakdown of these acres by reclamation category. Most interesting is the fact that almost two-thirds (2,835.49 acres) of this reclamation was in the graded pasture or cropland category. Less than 16% (684.91 acres) was reclaimed for strike-off pasture. Lower acreages are shown for reforestation (287.40 acres) and recreation or industrial land use categories (358.30 acres).

Over the whole time period of the OCM and MLR reclamation standards (1962 - 1972) it may be of interest to note a breakdown of the total 66,455.41 coal land reclamation acres under the OCM and MLR rules (Table II). Over 44% (29,464.99 acres) was reclaimed as graded crop or pasture; 45.63% for strike-off pasture and almost 6% was reforested. Other categories also are shown, in lesser amounts.

The last two columns on Table II might be regarded as bookkeeping columns because of the need to account for all bond releases that occur under actual transactions but not assignable to general land use category. For example, during 1975, 182.36 acres of bonded OCM or MLR area was rebonded for refuse disposal purposes. In those cases, surface mining bonds were released and replaced by refuse disposal bonds. Reaffected adjustment releases work similarly (last column of Table II). Where bonded acres are reaffected, the older bonds are released (to prevent double bonding) and these released acres are not properly assignable to a reclaimed land use category.

Some mention is probably in order concerning the high proportion OCM and MLR acreage reclaimed as graded crop or graded pasture land. One should recall that these laws do not require reclamation standards higher than that applying for

strike-off pasture. Complete grading, therefore is clearly something done (29,465 acres for coal, 745 acres for limestone, 77 acres shale and clay, 50 acres for silica sand and over 15 acres by sand and gravel operations) beyond legal requirements. There is no generally well understood explanation for this seemingly altruistic effort that exists. It is known that, in some instances, owners of lands leased to mining companies impose certain land reclamation restrictions on mining companies and this could account for some of the super legal reclamation. Some too is probably motivated by high value real estate location where the added expense of reclamation is readily recoverable.

## PART II (SMLC&RA AFFECTED ACRES RECLAMATION)

Table III gives data for acres affected and corresponding land reclamation on those acres, but this table deals only with the MLC&R Act that took effect with the first permit issued after September, 1971.

The total reclamation column, for coal, for example, shows 2,324 acres already reclaimed under 1973 permits and 485 acres reclaimed thus far under 1974 permits. It is interesting that 27 acres have already been reclaimed under permit issued for 1975.

Since three years are allowed to complete land reclamation work, it is somewhat noteworthy that, for permit year 1973, over 40% of the coal land acreage has been reclaimed even though the time limit does not expire until 1976.

One should understand that reclaimed acres tallied in Table III applies to completion of all grading and vegetation obligations. Grading work may or may not have been completed on other acres. Even where grading work has been completed and grading bonds released, such areas are still not tallied as completed, until bonds for revegetation have been released. This report does not show data for grading bonds nor graded acres because such are not summarized for publication purposes.

Of land reclamation completed to date (Table III), the preponderant category is pasture land with lesser amount of original grade pasture with rock limitations. The only row cropland released thus far is minor acreage performed by a limestone operation. It is expected that more significant cropland and original grade pasture acreages will be appearing in next year's reclamation statistics.

One should understand that the 801 acres of original grade pasture (Table III) is land that has met surface rock limitation criteria and would be suitable for cropland tilling; however, mine

operators involved have chosen to produce forage rather than row crops on this acreage, probably to enhance the soil's tilth and organic content by using legumes and grasses during the early years.

Forestry and wildlife land use categories involve only minor acreages of land reclamation. Industrial use seems to be especially suited for some limestone operations where reclaimed overburden areas are leveled and used for aggregate stockpile purposes.

The non-vegetation category in Table III is probably self-explanatory. Quarry type mining which creates a deep hole, if not flooded with water to form a lake, often has no soil to support vegetation. An exception under the law allows such areas to be approved under non-vegetation category. Data labeled "ADJ" as shown on the last two columns represents adjustment figures required by bookkeeping procedures to account for bond releases on lands that are not reclaimed but rather rebonded areas that are bonded again after the original bond was released, as explained in the footnotes of Table III.

The last item of clarification about Table III concerns acres affected. Totals for 1974 and older are fixed and no longer subject to change. Figures for permit year 1975, however, will change. The 1975 permit year extension acres will be added to acres affected in 1975 already shown and, on a state-wide basis, about one thousand acres per year commonly are involved. An example of this would be the 1974 annual report which indicates 4,590.55 acres were reported as affected by coal mines. In Table III of this year's report we find that the new total is 5,722.10 which means that there were 1,131.55 extension acres affected by coal mining last year (1975), under permits issued for permit year 1974.

## RECLAMATION PLANS

As new surface mining laws and new rules and regulations come about, it becomes necessary to account for new statistics that previously have not been tallied. By comparing Appendix Table A with the same table in the 1974 Annual Report, one can notice, under the pasture category, a new column labeled "darkened surface soiling". This is an early reflection of something, to become more common in subsequent years, as a new reclamation parameter brought on by the 1975 amended surface mining law.

Contrasting data with that for the preceding year, Table A shows 7,431.36 acres of permits issued in 1975 compared with 5,560 acres in 1974. Coal mining permit acreage especially showed noticeable increase from 4,983 to 6,701.

A breakdown of reclamation category shows that 50.35% will be reclaimed to pasture with 15% maximum slope; 5.95% will be graded to approximate original grade; 37.56% will be approximate original grade with rock limitations (suitable for row crop tilling); and 0.6% will be approximate original grade with darkened surface soil replaced. Only minor acreages are shown for other land use categories (Appendix Table A).

In 1974, 41.58% of the permits issued were for reclamation plans calling for restoring land to the approximate original grade. This figure, in 1975, has increased slightly to 44.11%.

It has already been mentioned elsewhere that a new surface mining law became effective July 1, 1975. Readers of this report should understand, however, that most permits for the year were processed and already issued prior to July 1, 1975. As a result, the newer (amended) rules, such as darkened surface soil criteria, will apply only to the few permits issued late in the year.

## **NONCOMPLIANCE AND BOND FORFEITURE**

Surface mining laws impose certain deadlines on mine operators. July 1 is the deadline for completion of grading work on preceding year's affected acreage and also is the deadline for bond release on acreage affected three years preceding under both the MLR and MLCR rules. September 1 is the deadline for submission of affected acreage reports. Other deadlines occur whenever time extensions are granted for specific time periods.

Under MLR rules, failure to meet a deadline results in a notice sent by certified mail informing the operator of the noncompliance and provides 90 days in which to correct or restore compliance. In the case of the MLC&R Act, only 45 days is allowed. In each case, failure to meet the new time period results in a 30-day letter sent by certified mail. The second notice (30-day notice) allows an operator opportunity to request a hearing. Failure of a satisfactory solution, after a 30-day notice expiration, results in bond forfeiture request to the Attorney General's office.

Just as has been occurring in preceding years, it was necessary, during 1975, to use all noncompliance mechanisms, including consummation of forfeitures.

It may be of some interest to compare noncompliance notices with the corresponding number in 1974. There were 10 ninety-day letters in 1975 compared with a total of 16 MLR notices in 1974. There were 4 thirty-day notices in 1975 compared with 5 notices in 1974 under the MLR rules.

Under the MLC&R Act, there were a total of 17 forty-five-day notices in 1975 compared with 10 notices in 1974. There were 5 thirty-day notices in 1975 contrasted with only one in 1974.

Two forfeitures were consummated in 1975 under the MLR Act and two under the MLC&R Act. The companies involved are listed in Table IV. It may be of some interest that forfeitures have already been requested under the 1971 act and it may be even more interesting that these two cases involve mining in permit year 1975. In the case of bankrupt companies, where forfeiture eventuation is sometimes a mere waiting of time deadlines, the Land Reclamation Division attempts to take advantage of earliest possible forfeiture so that subsequent actual cash disbursement and fund budgeting permits earliest possible state reclamation work, to correct environmentally deliterious mine sites.

As is shown listed on Table IV, there are now 21 companies that have experienced surface mining bond forfeiture in Illinois.

To date, the state Land Reclamation Division has expended forfeiture funds to reclaim 489.38 acres. Of this acreage, planting and seeding were done on 328.4 acres, in the spring of 1975. Land Reclamation Division personnel did the seeding work and super-

vised tree planting work performed by two tree planting contractors. Grading work on these areas was completed the preceding year.

Table IV also shows that there are 71.20 acres of forfeiture work remaining to be done contrasted with 289.40 acres remaining in 1974. The Land Reclamation Division regards the marked improvement in these figures as a significant achievement. Immediate reclamation and expenditure of forfeiture funds is not possible because forfeiture funds must be deposited in the state general revenue fund and the Land Reclamation Division requests appropriation of those funds from the state legislature.

*Technical Violations:* A mine in Johnson County was found surface mining coal without a permit. Coal less than 10 feet deep was removed which required no permit. However, coal in excess of 10 feet deep was uncovered but not yet removed. Upon being advised that removal of the coal could not be done without a permit, the operator voluntarily ceased operating and covered the coal and restored the land.

A Williamson County operator applied for a permit and started mining before receiving the permit. Upon being advised that this was illegal, the operator ceased operating voluntarily and, as a result, no injunction was sought.

A second Williamson County operator, it was later discovered, had already begun surface mining at the time a surface mining permit application was filed. A court injunction was promptly secured and the mine was ordered closed. The mine later reopened when the permit was issued, following the lifting of an injunction obtained by the state EPA for failure to secure a permit from that agency.

A mine in Jackson County changed ownership and was technically without a permit for the new owner. Because a state mine inspector posted a closure notice, this resulted in keeping the mine closed without court injunction, until the legalities of the permit question were settled. A similar experience occurred at a coal mine in Fulton County where a mine was found operating without a permit and a state mine inspector closure alleviated need for a court injunction.

*State Lawsuits:* The Department of Mines and Minerals is the defendant in a lawsuit filed by Catlin Township in Vermilion County. In a second action, the Department was sued by a village in Cook County. Both cases involve contesting of state authority in regard to surface mining permit issuance where conflict with local ordinances is alleged. These cases are in the hands of lawyers for both parties and no further information can be given at the present time.

## AFFECTED ACREAGE BY COUNTY – COAL

Since the major surface mining land disturbance in the state involves coal surface mining, Table V gives a summary of these acreages by county and also gives a total for the state. To avoid confusing figures with those in Table I or Table III, one should understand that Table V deals with acreage affected by indicated time period; whereas, Tables I and III involve permit issuance dates and summarize acreage under given permit identities.

As of the end of June, 1975, there have been 186,397 acres affected by coal surface mining in the state. Of this acreage, 103,181 acres was affected prior to existence of surface mining laws in the state. Table V also shows there were 66,656 acres affected under the OCM and MLR laws (1-1-62 through 6-30-72).

If we look at the coal affected acreage trend over the past four years, the following figures can be given:

1972	6,193.95
1973	5,741.50
1974	5,598.80
1975	5,219.82

The above figures show a clear trend of annual decreasing coal surface mining acreage. It can also be added that this trend of decreasing acreage has persisted since 1969.

The increased acreage of permits issued in 1975 would suggest that the trend of decreasing coal surface mining is due to be reversed. However, we cannot yet state such with certainty.

There are six counties listed in Table V with affected acreage in the "five figure" category. These counties are Fulton, Knox, Perry, Saline, St. Clair, and Williamson. Randolph County will enter this group in 1977 if the 1975 acreage is equaled in 1976 and 1977.

Only one county experiences one thousand acres or more of surface mining annually and that is Perry County. Randolph and Fulton Counties are the next in order of acreage affected annually, followed by Knox County.

Two counties have experienced surface mining acreage in excess of 5% of total county acreage. These are Perry (9.32%) and Fulton (8.04%).

Total number of counties which have experienced some coal surface mining stands at 40. This number has not changed in 1975. In 1975, coal surface mining was active in 15 counties and this number also is the same as was experienced in 1974.

## REFUSE DISPOSAL PERMITS

Table VI shows a summary of refuse disposal permits. One should note that MLR and MLC&R Act permits are listed separately. Gob disposal permits are issued only for coal mines; whereas, slurry permits are issued for all commodities where mineral beneficiation and subsequent refuse or tailings disposal is required.

There have been 69.98 acres reclaimed and bonds released for gob permits and 9 acres of slurry permits, under the MLR Act.

Contrasting with data from the 1974 Annual Report, under the MLC&R Act permits, the acreage of gob disposal permits has increased from 570.59 to 643.59 and there have been 43 acres released.

There are now 31 active slurry permits under the SMLC&R Act with total acres accumulated to 1,070.39. There have been 24.4 acres of coal slurry released as reclaimed during 1975. Slurry permit acreage represents a sharp increase from the 578.23 acres of permits in existence during 1974.

Separate provision for refuse disposal permits is a unique feature of the Illinois surface mining laws. In terms of water pollution potential especially, refuse disposal areas, with improper disposal practices, could cause environmental degradation much more serious than that caused by surface mining practices, in some instances. As a result, acreage of refuse disposal permits might be regarded as acreage of "problem" sites which were prevented from developing, because of the permit system and reclamation requirements.

## STATE SPONSORED RESEARCH

Previous Annual Reports have mentioned a modest effort by the Land Reclamation Division to revegetate old gob disposal lands by treatment without soil covering. It can be reported that vegetation established continues to flourish and the oldest plots have now survived five growing seasons.

It was initially intended that this modest effort might help point the way for other more significant projects where large areas of old gob piles occur and are a continuing source of acidic water pollution. It has been learned that one company plans to treat a very large gob pile by the use of some of the techniques developed in the above-mentioned research project. Work was planned to get underway in 1976.

The major advantage of treating gob with lime, other than cost

**TABLE VI**

advantage, is that by not using borrow soil, it will not be necessary to ruin one piece of land in order to treat a problem site.

## STATE MODIFICATION OF PROPOSED RECLAMATION PLANS

Of the 7,431.36 acres for which reclamation plans were approved, Appendix Table B shows that these plans were modified on permits totaling 1,321.60 acres. This was a substantial decrease from the 1,965 acres for which plans were modified in 1974.

When plans are modified by the Land Reclamation Division, most operators take note of the modifications and incorporate those changes into their own proposed plans the following year. As a general rule, the need for modifications of reclamation plans is brought on by ambiguities or oversights and resultant modifications are intended to make clarifications and corrections on approved plans with Department of Mines and Minerals addenda.

Appendix Table B is being used for the last time in this Annual Report because, with issuance of permits under the 1975 amended Act, proposed plans will no longer be modified as a part of the approval process. Henceforth, proposed plans will be either approved as presented or they will be rejected and returned for correction.

A new feature of the 1975 amended act provides for public hearings to be held where the county board requests such. The Land Reclamation Division's hearing officer presides at such hearings, and opportunities for testimony and rebuttle are provided. No permits are approved until proper hearings, or the required opportunity for such, comes about. During 1975, there were two hearings held and, in one case, the proposed plan was rejected and the permit denied.

## LAND USE PATTERN PRIOR TO SURFACE MINING

Appendix Tables D and E are identical except that Table D involves lands to be surface mined and Table E involves lands to be affected by refuse disposal.

Table D shows that, for permits issued in 1975, 53.28% of the lands were previously in cropland use, 15.03% was pasture, 30.76% forest, and 0.93% was industrial land.

Data of this type has been accumulated only since 1972. It might be of interest to mention trends over the four-year period, to indicate the types of lands being surface mined. The highest portion of cropland was involved in 1972 when 60.5% of the

permit acreage was cropland. The lowest was in 1974, when 49.21% was involved with cropland acreage.

The proportion of pasture land for 1975 permits was 15.03%. This was the lowest in four years. The highest proportion of pasture land was involved with permits issued in 1973, when 28.88% of the permit acreage was pasture.

Forest lands amounted to 30.76% of 1975 permit acreage. This was the highest forest acreage year. The lowest amount of forest acreage was in 1973, when 20.02% of the permit acreage was on forest land.

Industrial and recreation lands have amounted to one percent of permit acreage or less except for 1972, when the amount was 1.27%.

By contrasting Appendix Table D with Appendix Table A, one can get some idea of trend in before mining versus after mining land use pattern. Actual pre-mining land use will not be quite as significant in the future as in the past, because of a change in the 1975 amended law. Land use capability will be more important than actual land use because of ramifications involving post-mining land use choice options.

Appendix Table E shows land uses existing on lands to be devoted to refuse disposal. It is probably very desirable that the majority of the acreage involves land previously affected by surface mining. Naturally, all surface-mined acreage used for refuse disposal means that much less natural land is prevented from being affected by surface mining activities. Also, it is very fortunate that, following proper land reclamation, after refuse disposal, land improvement frequently results. Large valleys, for example, frequently are leveled, after having been filled with gob and covered with earth.

### **ASSESSED VALUATION AND OWNERSHIP OF LANDS BEING SURFACE MINED**

Surface mining permit applicants are required to submit, on the permit application, information about land ownership and assessed valuation. For permits issued during 1975, this data is summarized in Appendix Table F. By comparing with the same table from Annual Reports dating back over the last four years, a little stronger indication about data trends should be possible. No given single year can be properly presumed to be a typical year.

Considering tax valuation first, in 1975, about 46% of the acreage to be mined involved lands assessed at less than \$100 per acre. This was the highest proportion of this category over the past

four years. The percentage of under \$100 per acre was the lowest (29%) in 1972. In fact, there is a trend indicated as follows: in 1972, 28.64%; in 1973, 30.21%; in 1974, 41.84%; and in 1975, 46.05%.

The under \$150 per acre category is apparently a significant dividing line because, fairly consistently, about 60% or more of acreage to be mined falls in this category. The proportion of 1975 permit acreage under \$150 per acre was 63.34% as shown in Appendix Table F.

If we go to the other end of the scale and consider tax assessed valuations from \$250 per acre and higher, there seems to be no trend over the past four years. In 1975, the proportion in this category was 19.37% and the lowest proportion in this category (5.85%) was experienced in 1973.

Figures already discussed apply to all minerals. One can notice, from the way numbers are arrayed in Appendix Table F, that coal mining tends to occur on lower value real estate. Aggregate type mining tends to occur on lands with higher assessed valuation because of attempts to produce aggregates closer to cities and towns, in order to reduce hauling cost. Limestone seems to be an exception from other aggregate minerals and its pattern seems to be somewhat similar to that for coal mining.

Ownership of lands being surface mined are shown in Appendix Table F. One can put together an array of data on ownership of land by comparing Table F out of the last four years' Annual Reports. It was decided that only coal, limestone, and sand and gravel mining presented enough data to justify analysis. What the four-year composite data shows is that ownership of coal mining properties has varied from 72% to over 76% corporate ownership with no trend apparent, over the four-year period. On the other hand, limestone mining preponderantly seems to occur on leased properties with only 43.1% being on corporate ownership, in 1975. Ownership of limestone mining properties has shown progressively increased corporate ownership with percentage figures being 33.1, 34.1, 41.9 and 43.1 respectively, from 1972 through 1975.

Sand and gravel mining seems to be done on the highest proportion of corporate ownership of any mineral being surface mined. In 1975, 87.5% was corporate land ownership. The proportion was as high as 97.6% in 1973; however, there is no apparent four-year trend in ownership proportion.

There is some common speculation that, especially for coal mining properties, higher land reclamation standards being practiced, which bring about reclaimed lands of greater value, may

affect land ownership patterns. It is reasoned that landowners might prefer to lease the land for mining under terms where they will regain control following mining so that the benefits of better land reclamation will accrue to them. However, there is yet no solid evidence to show that such may be occurring, despite the fact that the proportion of corporate ownership on mine permit lands in 1975 was the lowest in the last four years.

### **SURETY BONDS**

Appendix Table G shows the amount of surety bonds involved with 1975 surface mining as well as refuse disposal permits. Almost eight million dollars are involved. The reader should understand that bonds held for prior years are not listed. In fact, no effort is made to keep a cumulative tally of surety bonds held at a given time.

One should understand that, in general, bonds do not represent cash in hand. There are some cases where smaller operators have deposited, in lieu of surety bond, certificates of deposit or certified checks. In such cases, these instruments are turned over to the State Treasurer for safekeeping. The proportion of these, however, is relatively small.

In general, mine operators purchase surety bonds from insurance or other bonding agencies. The instrument held by the state, in such cases, is a certificate showing that the bonding company will pay the specified sum in the event a default (failure to reclaim the affected acreage) should occur. Whenever conditions for bond forfeiture consummation materialize, majority of bonding companies promptly do pay the cash due, upon receipt of proper legal documentation and request from the State Attorney General. Substance of such documentation, of course, must be furnished by the Land Reclamation Division. There are cases; however, where substantial legal exercise must be undergone before a bonding company agrees to pay the amount due. There has been only one instance where a bonding company would not honor the claim filed and, in that case, the bonding company is in bankruptcy and final settlement probably will be long delayed.

### **SURFACE MINING TECHNIQUE**

Appendix Table H summarizes acreages mined by various techniques, for permits issued during 1975.

Since coal acreage is the most significant, a separate table was prepared showing coal permit mining techniques over the last four

years, in order to determine if any significant trends exist. Of the four major techniques in surface mining, the ratio of each type seems to have shown no significant change over the four-year period. Dragline mining showed the highest proportion with 37% of the total, in 1972. In 1975 over 32% of the coal acreage was affected by dragline mining. Almost 30% of the 1975 permit acreage was issued for shovel mining and the lowest proportion of coal mining by shovel was just over 23%, in 1972. Wheel and shovel combination mining has been the third most important technique of coal surface mining, with almost 23% being of this type, in 1975. This type of mining has generally been just above 20%, except for 1973, when the proportion was over 32%.

The most erratic coal mining technique proportion involves the dragline and shovel combination, sometimes referred to as tandom mining. In 1975, almost 9% of all coal surface mining was by this type; whereas, the proportion has been as high as over 15% in 1972 and as low as 4% in 1973.

Surface mining by dozer and scraper technique tends to predominate generally in aggregate type mining; however, as shown in Appendix Table H, significant coal mining in Illinois is not done by this method.

The column labeled miscellaneous type mining, on Appendix Table H, accounts for acreages of permits for mining related activities, such as roads or drain ditches, but not actually surface mining.

## OVERBURDEN DEPTH

Information on overburden depth, for areas permitted during 1975, is summarized in Appendix Table I. Information of this type has been available only in the last four years. Proper understanding of this data requires that one not misunderstand the data system input. To be emphasized is the fact that overburden depth data is not precisely engineered data. Rather, permit applicants are asked to submit estimates of overburden depths wherein, they must take into account minimums and maximums and somehow, arrive at a figure to enter on the application form. Consequently, this type of information is useful only to the extent that long term trends may be indicated. Actual figures for a given year probably don't tell us much.

If one were to assemble the last four years' Annual Reports and calculate overburden depth percentages in each depth category for coal permits, some slight trend indication becomes apparent, from the way the percentage numbers are arrayed. For example, the

highest percentage (42.2%) of coal acreage 50 foot depth or less was in 1972; however, there is no consistent time-related trend over the past four years in this category. There appears to be the makings of a possible trend in the over 76 foot depth category. The highest proportion (29.4%) in this category was experienced in 1975 and the lowest proportion (12.2%) was experienced in 1972. Consistently, the coal mining depth category with the plurality among categories has been the 51 to 75 foot category, for coal surface mining.

It seems logical to presume that coal mine operators will attempt to exploit shallow coal seams and avoid deeper coal seams, so long as a choice exists. Predictably, overburden depths must increase, over significant time periods. The interesting facts to ponder are those matters affecting availability of shallow coals for surface mining, such as rate of discovery, rate of commercial availability for exploitation, and the rate of actual mining of these areas. It does appear that, from the data available, four years is probably too short a time period in which to discern significant meaningful trends in overburden depth experienced.

### MISCELLANEOUS ACTIVITIES

A new activity during 1975, later to become a routine annual activity, involves public hearings held at the request of county boards. Two such hearings were held for permits issued in 1975 and both were in Fulton County.

Other hearings were held by the Department of Mines and Minerals in connection with promulgating rules and regulations for the 1975 amended surface mining act.

A great deal of activity occurs routinely such as telephone calls, letters requesting information, groups wanting someone to explain the law, individuals or groups that wish to visit land reclamation projects or to visit a surface mine. Such activities can and do require considerable time on the part of the Land Reclamation Division staff throughout the year.

A listing of some field tours in which the Division staff participated will give some idea of the scope of such activities. Groups or individuals involved included: Soil Conservation Society, news media reporters, a consulting engineer group, conservation education class, student research workers, and cooperative university research interest groups.

Division staff members made numerous presentations before various groups throughout the state, including: State fair, school classes, county boards, conservation groups, radio programs,

technical reclamation organizations including the National Association of State Land Reclamationists and a reclamation association in Appalachia. It should be noted that legislative changes, as had occurred in 1975, sharply increases the flow of questions, inquiries and communication responses in order to keep the public informed about those legal changes and explaining the ramifications of interest.

As mentioned previously, under discussion of bond forfeiture work, a significant tree planting project was completed during 1975. Under two separate tree planting contracts, a total of 187,000 tree seedlings were planted under terms where the Division purchased and delivered the planting stock and supervised the planting work and did so without undue interruption of continuing regular duties. On areas reclaimed for forage production, the Division purchased 1,132 pounds of grass and legume seed and used their own staff to do the seeding work, because it was feared that time delay caused by contract bidding requirements might delay seeding work beyond preferred seeding time.

One staff member was appointed, in 1975, by the U.S. Geological Survey, to serve on a National Technical Advisory Committee that is working on the preparation of a manual on land reclamation especially designed for planning workers.

One brief comment about the preparation of this report may be in order. Staff members already fully committed with regular duties, on an ad hoc basis, prepare the data and create this Annual Report. This, hopefully, explains the "unvarnished" nature of this report, manifested by absence of illustrations, pictures, and charts. Perhaps, through added zeal and resourcefulness, future reports might reflect such improvement, at least to some degree.

## APPENDIX

NOTE: Appendix tables concerning surface mining permit acreage involve data about permits issued between July 1, 1975 through December 31, 1975.

Appendix tables concerning refuse disposal permit acreage involve data about acreage permitted between January 1, 1975 through December 31, 1975.

All appendix tables pertain to the Surface-Mined Land Conservation and Reclamation Act.

## DIVISION OF OIL AND GAS

The Division of Oil and Gas of the Department of Mines and Minerals is required to enforce the provisions of "An Act in Relation to Oil, Gas, Coal and Other Surface and Underground Resources," and the Rules and Regulations formulated pursuant to the provisions of the Act.

It is the duty of the Division to see that oil wells are properly spaced; to control the drilling and plugging of oil wells and wells drilled in connection therewith; to see that necessary precautions are observed to protect the workable coal seams through which wells are drilled and to prevent pollution of land and fresh water supplies resulting from oil field operations.

Permits must be obtained from the Division of Oil and Gas before wells are drilled for oil, gas, watersupply, water input, gas input, air input, salt water disposal, and structure test. In 1975, 1,241 such permits were issued. The Law requires that for each well drilled or acquired, the operator must furnish the Division with bond coverage to guarantee the eventual plugging of the well with the satisfactory restoration of the well site. The State oil well inspectors are in attendance to supervise the plugging of all abandoned drill holes, which in 1975 numbered 1,498.

The Division furnishes copies of permits and plugging affidavits to the State Geological Survey, and is charged with the responsibility to seeing that well logs and cuttings are sent to the Survey. The Division also receives and records completion data on wells drilled.

The Rules and Regulations of the Division provide for the calling of public hearings, upon written request of any interested person, for the purpose of taking action with regard to any matter within the jurisdiction of the Department. All such hearings are made of record in the Division and are open to public inspection.

The Oil and Gas Board consists of four members and the Director of the Department, and is subject to call by the Mining Board for advice and consultation on matters pertaining to the oil and gas industry.

STATE OF ILLINOIS  
DEPARTMENT OF MINES AND MINERALS  
SPRINGFIELD, ILLINOIS

In the Matter of the Petition of Marathon Oil Company filed pursuant to Spacing Rule IV(1)(A)(2) and Illinois Revised Statutes, Chapter 104, Section 82a, for a Field-wide 40-Acre Spacing Order in the Devonian Formation for the Lawrence Field, located in parts of Townships 3, 4 and 5 North, Range 12 West, and Townships 4 and 5 North, Range 13 West, Lawrence County, Illinois.

HEARING ORDER  
NO. 224

**REPORT OF THE MINING BOARD**

On October 29, 1975, Marathon Oil Company, an Ohio corporation, authorized to do business in the State of Illinois, filed a Petition with the Department of Mines and Minerals for a field-wide 40-acre spacing Order in the Devonian Formation for the Lawrence Field, Lawrence County, Illinois.

After due notice as provided in Illinois Revised Statutes, Chapter 104, Section 82a, and by Rules of Procedure in Public Hearings for the Department of Mines and Minerals, a public hearing was held on said Petition on November 17, 1975, in the City of Springfield, Illinois. At such hearing, before the Department of Mines and Minerals, the Petitioner submitted proof, exhibits, evidence, and testimony in support of said Petition. Other interested parties were afforded an opportunity to be heard in connection therewith.

**FINDINGS OF FACT**

The Department of Mines and Minerals finds:

- (1) That Marathon is the owner and operator of a substantial number of oil and gas leases in the Lawrence Field,

hereinafter delineated, and is thereby an interested party in the establishment of field-wide spacing for this field; and

- (2) That in February, 1975, commercial production was established from the Devonian Formation by Marathon in the J. B. Lewis No. 77 well, located in the Northeast Quarter of the Southwest Quarter of Section 29, Township 4 North, Range 12 West, Lawrence County, Illinois; and
- (3) That the Devonian Formation lies at a depth of less than 4,000 feet below the surface; and
- (4) That in the absence of a specific order of the Mining Board, the General Spacing Rule IV(1)(A)(b) is applicable which, in essence, provides for 20-acre drilling units for the Devonian Formation in the Lawrence Field; and
- (5) That Marathon has drilled a number of step out wells and, based on Devonian tests in the area, has determined that the Lawrence Field is delineated and located within the following area:

East Half of Section 35; Section 36, all in Township 5 North, Range 13 West; and

Southwest Quarter of Section 31, Township 5 North, Range 12 West; and

East Half of Section 2; East Half of Section 11; East Half of Section 14; Sections 1, 12, 13, 24; North Half, and Southeast Quarter of Section 25; East Half of Section 36, all in Township 4 North, Range 13 West; and

South Half, and Northwest Quarter of Section 6; Sections 7, 18, 19, 30, 31, 20 and 29; Southwest Quarter of Section 8; South Half, and Northwest Quarter of Section 17; Southwest Quarter of Section 28; West Half of Section 33; North Half, and Southeast Quarter, and West Half of Southwest Quarter of Section 32, all in Township 4 North, Range 12 West; and

Sections 6, 5 and 8; and West Half of Section 4; West Half of Section 9; Northwest Quarter of Section 16; North Half of Section 17; Northeast Quarter of Section 18; North Half, and Southeast Quarter of Section 7, all in Township 3 North, Range 12 West,

Lawrence County, Illinois,

hereinafter called the "Lawrence Field"; and

- (6) That Marathon has, by drilling oil and gas wells and conducting production tests, transient pressure tests, and pressure interference tests, determined that one well can efficiently and economically drain a 40-acre drilling unit.

### CONCLUSIONS OF LAW

That Illinois Revised Statutes, Chapter 104, Section 82a, applies to the Petition of Marathon Oil Company and these proceedings before the Department of Mines and Minerals.

That the Department of Mines and Minerals has jurisdiction of the subject matter and the persons interested therein; that due and proper notices of the Petition and of the time, place and purpose of the hearing were given as required by law; that all interested parties were afforded an opportunity to be heard therein; and

That for the prevention of waste, to protect and enforce the correlative rights of the owners in the pool, and to prevent the drilling of unnecessary wells, this Petition should be granted.

### ORDER OF THE DEPARTMENT OF MINES AND MINERALS

It is, therefore, ordered by the Department of Mines and Minerals as follows:

(1) That the Petition of Marathon Oil Company for an order establishing field-wide drilling units of forty (40) acres of surface area, lying within a Quarter-Quarter Section of land (as established by the United States Public Land Survey made pursuant to the provisions of an Act of Congress) for wells drilled or deepened for the production of oil and gas from the Devonian Formation, the top of which is found at a depth of 2,911 feet, as shown on the Dual Laterolog of Marathon's J. B. Lewis No. 78 well located 671 feet South and 668 feet East of the Northwest corner of the Northwest Quarter of the Southwest Quarter of Section 29, Township 4 North, Range 12 West, Lawrence County, Illinois, is hereby granted.

(2) That this Order shall cover the following described area:

East Half of Section 35; Section 36, all in Township 5 North, Range 13 West; and

Southwest Quarter of Section 31, Township 5 North, Range 12 West; and

East Half of Section 2; East Half of Section 11, East Half of Section 14; Sections 1, 12, 13, 24; North Half, and

Southeast Quarter of Section 25; East Half of Section 36, all in Township 4 North, Range 13 West; and

South Half, and Northwest Quarter of Section 6; Sections 7, 18, 19, 30, 31, 20 and 29; Southwest Quarter of Section 8; South Half, and Northwest Quarter of Section 17; Southwest Quarter of Section 28; West Half of Section 33; North Half, and Southeast Quarter, and West Half of Southwest Quarter of Section 32, all in Township 4 North, Range 12 West; and

Sections 6, 5 and 8; and West Half of Section 4; West Half of Section 9; Northwest Quarter of Section 16; North Half of Section 17; Northeast Quarter of Section 18; North Half, and Southeast Quarter of Section 7, all in Township 3 North, Range 12 West,

Lawrence County, Illinois.

(3) That no more than one well may be drilled on each drilling unit established by this Order.

(4) That the well drilled for each unit be located not less than 450 feet from the nearest external boundary lines of the drilling unit.

(5) That all royalty interests within each separate drilling unit be integrated and that each Royalty Owner within the unit participate in the royalty from the well drilled thereon in the proportion to the interest owned by such Royalty Owner bears to the total of such interest in the entire unit.

(6) That whenever the topographical conditions of the drilling unit render it impractical, without unreasonable expense, to drill a well at a location in conformity with the spacing rules, the Mining Board may alter the location after investigation and verification of the topographical conditions.

(7) That in the case of irregular Sections, containing more or less than 640 acres, the Mining Board shall allow exceptions or create units in order to absorb the entire acreage in such Sections into drilling units.

DATED at Springfield, Sangamon County, Illinois, this 4th day of December, 1975, A. D.

BY ORDER OF THE STATE MINING BOARD:

RUSSELL T. DAWE,  
*Executive Officer*

STATE OF ILLINOIS  
DEPARTMENT OF MINES AND MINERALS  
SPRINGFIELD, ILLINOIS

In the matter of applications of R. Gail Heath and W. R. Ewing, doing business as Heath Oil Production for an integration order to establish drilling units and to authorize the drilling of wells to be known as the Stoltz-Middagh Unit #1-D and the Stoltz-Middagh Unit #2-D.

HEARING ORDER  
NO. 223

WHEREAS, R. Gail Heath and W. R. Ewing, doing business as Heath Oil Production, are the owners and operators of the Oil and Gas lease commonly known as the Stoltz Heirs lease of the real estate described as follows:

The West 25 acres of the East Half ( $E\frac{1}{2}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West, Lawrence County, Illinois.

And, WHEREAS, Marathon Oil Company is the owner and operator of the Oil and Gas lease commonly known as J. R. Middagh lease covering real estate including:

The West 15 acres of the West Half ( $W\frac{1}{2}$ ) of the East Half ( $E\frac{1}{2}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West, Lawrence County, Illinois.

And, WHEREAS, R. Gail Heath and W. R. Ewing, doing business as Heath Oil Production, have applied for an integration order to establish drilling units consisting of 20 acres and described as follows:

The West Half ( $W\frac{1}{2}$ ) of the Southeast Quarter ( $SE\frac{1}{4}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) to authorize the drilling of a well to be known as:

Stoltz-Middagh Unit #1-D to be located 660 feet North and 330 feet East of the Southwest Corner ( $SWc$ ) of the Southeast Quarter ( $SE\frac{1}{4}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West of the Second Principal

Meridian, Lawrence County, Illinois;

and

The West Half ( $W\frac{1}{2}$ ) of the Northeast Quarter ( $NE\frac{1}{4}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) to authorize the drilling of a well to be known as:

Stoltz-Middagh Unit #2-D at a location 660 feet South and 330 feet East of the Northwest Corner (NWc) of the Northeast Quarter ( $NE\frac{1}{4}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West of the Second Principal Meridian, Lawrence County, Illinois.

And, WHEREAS, it is contemplated that the proposed wells to be so drilled are for the production of oil from such oil bearing formations as may be encountered from the base of the McClosky Formation to the base of the Devonian Formation.

And, WHEREAS, compliance with the current spacing regulations will require the integration of the above described leaseholds into twenty acre drilling units insofar as they cover:

The West Half ( $W\frac{1}{2}$ ) of the Northeast Quarter ( $NE\frac{1}{4}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ), and the West Half ( $W\frac{1}{2}$ ) of the Southeast Quarter ( $SE\frac{1}{4}$ ) of the Southwest Quarter ( $SW\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West, of the Second Principal Meridian, Lawrence County, Illinois.

And, WHEREAS, Marathon Oil Company has objected to such spacing and integration.

And, WHEREAS, by order of the State Mining Board a hearing on said applications for permits and objections thereto was duly held in the Office of the Division of Oil and Gas, Room 704, State Office Building, Springfield, Illinois, at 10:00 A.M. (DST) Monday, September 8, 1975.

Present at the hearing for the State Mining Board was Mr. George R. Lane, Petroleum Engineer.

And, WHEREAS, the evidence and arguments then offered on behalf of the respective parties were received and the matter taken under advisement for consideration and determination in due course.

NOW THEREFORE, pursuant to said hearing, consideration and determination, it is ordered:

1. That the objections of Marathon Oil Company be and they

are hereby overruled.

2. That the applications of R. Gail Heath and W. R. Ewing, doing business as Heath Oil Production, for permits to drill the following described wells to be located:

Stoltz-Middagh Unit #1-D to be located 660 feet North and 330 feet East of the Southwest corner (SWc) of the Southeast Quarter (SE $\frac{1}{4}$ ) of the Southwest Quarter (SW $\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West, Lawrence County, Illinois; and

Stoltz-Middagh Unit #2-D to be located 660 feet South and 330 feet East of the Northwest corner (NWc) of the Northeast Quarter (NE $\frac{1}{4}$ ) of the Southwest Quarter (SW $\frac{1}{4}$ ) of Section 32, Township Four (4) North, Range Twelve (12) West, Lawrence County, Illinois,

be and they are hereby granted.

3. That the separate tracts and leaseholds within the combined area hereinabove described shall be and they are hereby integrated for testing, development, maintenance and production of 20 acre drilling units as to formations from the base of the McClosky Formation to the base of the Devonian Formation.

4. That the resulting production shall be divided between the respective owners in the proportions that the acreage of each separate tract bears to the total unit acreage that is to say, 62.509680 per cent thereof unto R. Gail Heath and W. R. Ewing, doing business as Heath Oil Production and their lessors, and 37.490320 per cent unto Marathon Oil Company and its lessors as such percentages have been determined by the submitted plat hereto attached and made a part hereof.

5. R. Gail Heath and W. R. Ewing, doing business as Heath Oil Production shall drill, equip and operate the well or wells on said units.

6. Unless Marathon Oil Company shall forthwith elect, by notice in writing, to voluntarily participate in the unit well or wells and undertake payment of its prorata share of the reasonable and actual costs of the drilling, completion equipment and interest, such prorata cost shall be recovered from its share of the production, until the market value thereof, exclusive of royalty, equals (1) 100% of such prorata share of costs and expenses of all surface equipment and its share of the cost of operating the well

or wells commencing with the first production and (2) 150% of its prorata share of the actual costs and expenses of drilling, testing and completing said well or wells.

DATED at Springfield, Sangamon County, Illinois, this 24th day of September, 1975, A. D.

BY ORDER OF THE STATE MINING BOARD:

RUSSELL T. DAWE,  
*Executive Officer*
